

ATTACKER

IT-Attacker

Stockholm onsdagen 8 maj 2019

Välkommen till Madison Events IT-säkerhetskonferens, IT-Attacker!

I takt med att den tekniska utvecklingen gör stora framsteg inom IT, är det inte bara IT-lösningarna som utvecklas och hjälper företag att skydda sina verksamheter. Även cyberbrottslingarna drar nytta av den nya tekniken för att kunna skapa mer avancerade attacker. AI och Machine Learning är exempel på just detta. Samtidigt som IT-säkerhetsexperter implementerar den nya tekniken i säkerhetslösningar, exploateras den av brottslingarna – en kapprustning vi hoppas att säkerhetsbolagen vinner!

Hotbilden inom IT har aldrig varit allvarligare, vilket gör att beslutsfattare inom alla företag har ett behov av att hålla sig uppdaterade. Under dagens konferens har vi samlat ledande leverantörer som tillsammans kommer att belysa de senaste trenderna och nyheterna inom området. Som deltagare kommer ni att få ta del av många användbara tips och nyttiga insikter som är relevanta för ert arbete.

Välkommen till en lärorik dag!

Ur dagens program

- Om att ligga steget före IT-Attacken
- Träna era säkerhetsexperter
- Riktade cyberattacker mot individuella identiteter
- Hur AI kan användas för att förhindra, automatisera, skala och öppna dörrar till nya och tidigare obekanta scenarier

Agenda

08:30 – 09:00 **Registrering och mingel i utställningen med frukost**

09:00 – 09:15 **Välkomna - Inledning**

09:15 – 09:50 **Using AI as a force multiplier**
Henrik Åkerstrand, BlackBerry Cylance

09:55 – 10:30 **Is it really you? Protect your Digital self**
Pedro Martins, LastPass by LogMeIn

10:30 - 10:55 **Kaffepaus**

10:55 – 11:30 **Who can we trust?**
Christoffer Callender, Symantec

11:30 – 12:15 **Lunch och mingel i utställningen**

12:15– 13:00 **Om att ligga steget före IT-attacken**
Christoffer Strömblad, Polismyndigheten

13:05 – 13:40 **Train Your Security Experts Like Fighter Pilots**
Andreas Nordenadler, Cyberbit

13:45 – 14:20 **Paneldiskussion, modererad Q & A och kaffe**

14:20 – 14:30 **Avslutning**

Talare

Andreas Nordenadler, Cyberbit

Andreas Nordenadler is the regional manager at Cyberbit in Nordics, working with key partners, auditors and customers in the region as a trusted expert. Cy-

berbit provides a unique portfolio of products for cybersecurity training, simulation, detection and response for the converged spectrum of IT and OT networks. The portfolio is based on advanced, battle-proven technologies deployed in government and military organizations, made available to the commercial market since 2015, and includes Cyberbit Range: the world-leading cyber range platform, providing hyper-realistic, simulated Blue and Red team training.

Christoffer Strömblad, Polismyndigheten

Christoffer Strömblad är senior rådgivare på Polismyndigheten. Christoffer har stor erfarenhet av att arbeta med frågor som rör

cybersäkerhet på såväl nationell som internationell nivå. Områden som Christoffer har inriktat sitt arbete på är t.ex. avancerat cyberförsvar, offensiva förmågor och underrättelser inom cyberdomänen. Christoffer har sedan 2001 arbetat med IT-säkerhetsfrågor utifrån ett brett såväl som djupt perspektiv med exempelvis strategiska ledningsfrågor och bits and bytes-områden såsom systemutveckling och reverse engineering.

Christoffer Callender, Symantec

Senior Manager, Security Engineering, Nordics. Christoffer is a well-known speaker in the security industry and has been working with the largest customers in the Nordic region discussing their security challenges. Being able to understand the business challenges and then mapping that to a sustainable integrated security platform is the most important topic he focuses on. The best security strategy is an integrated strategy.

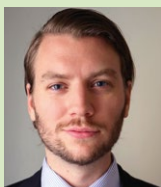

Senior Manager, Security Engineering, Nordics. Christoffer is a well-known speaker in the security industry and has been working with the largest customers in the Nordic region discussing their security challenges. Being able to understand the business challenges and then mapping that to a sustainable integrated security platform is the most important topic he focuses on. The best security strategy is an integrated strategy.

Pedro Martins, LastPass by LogMeIn

Originally from Portugal, Pedro Martins is an Information Security Consultant at LogMeIn with over 20 years of experience in IT

in various areas from Infrastructure to Cloud. He works closely with LogMeIn and Security experts to make sure their Product LastPass is aligned with Industry standards and security best practices. As part of his role he advises customers how to mitigate risk around Identities using – amongst other solutions – their flag product LastPass.

Henrik Åkerstrand, BlackBerry Cylance

Henrik is the Regional Manager for Northern Europe for BlackBerry Cylance. BlackBerry Cylance is revolutionizing cybersecurity with

AI based solutions that predict and prevent execution of advanced threats and malware at the endpoint. Henrik has 10+ years of experience in the IT security space within various vendors and holds a Master's degree in Engineering and Bachelor's degree in Economics from Uppsala University.

Partners

CYLANCE.

AI-based security is a powerful force multiplier. BlackBerry Cylance focuses the power of artificial intelligence on autonomous security decision making that is designed to stay ahead of attackers—years ahead. Our native AI solutions deliver the threat prevention, detection, and response capabilities security teams need to maximize their own expertise with better insight—and in turn drive better informed strategic security decisions.

Cyberbit provides a unique portfolio which includes: Cyberbit Range: the platform, providing hyper-realistic, simulated Blue and Red team training; SCADASHield: ICS/SCADA for critical infrastructure networks, also mobile version; SOC 3D: SOAR; and EDR: Endpoint Detection and Response for behavioural detection of advanced threats. Offices in Israel, US, India, Germany, Singapore.

LastPass manages your passwords and online life, so you don't have to. We've made going online easier and safer, and supporting all of your browsers, operating systems, and mobile devices since 2008. LastPass Enterprise scales SSO and password management for teams small and large, helping IT be more secure, maintain compliance, and increase productivity of the organization. The last password you'll ever have to remember.

Polismyndigheten ska tillsammans med övriga myndigheter inom och utom rättsväsendet genom sina insatser bidra till målet för kriminalpolitiken – att minska brottsligheten och öka människors trygghet

Founded in 1982, Symantec has evolved to become the global leader in cyber security, with more than 11,000 employees in more than 35 countries. Operating one of the world's largest cyber intelligence networks, we see more threats, and protect more customers from the next generation of attacks. We help companies, governments and individuals secure their most important data wherever it lives.
